Meniscus Root Repair Protocol

	Phase I: weeks 0-4	Phase II: 5-6 weeks	
Weight-Bearing and Immobilization	 NWB (TTWB as needed for balance) with brace locked in full extension Brace locked in full extension while ambulating and sleeping. Brace may be unlocked for non-weight-bearing PT exercises. Brace may be removed for hygiene only. 	 Progress to partial weight-bearing (~20 lbs.) from 0-90° only Brace 0-90°. Brace may be removed for hygiene only. 	
Aerobic	• None	• None	
Range of Motion (ROM) and Strengthening	 Progress from PROM to AAROM to AROM as tolerated without restriction (non-weight-bearing) Emphasis on full-extension Heel Slides Isometric quad sets Patellar mobilization Straight-leg raises (with brace until able to do SLR without extension lag) Ankle pumps 	 Continue exercises from Phase I Unrestricted ROM however to partial-weight bearing past 90° 	
Other	Modalities as needed to reduce swelling and improve muscle recruitment Home Exercise Program (HEP) per discretion of Physical Therapist		
Goals	Pain controlProtection of tissue healingMinimize joint stiffness	Progress ROMBegin weight-bearing	

	Phase III: weeks 7-12	Phase IV: 13-16 weeks	Phase V: >16 weeks	
Weight-Bearing and Immobilization	 Discontinue brace when no extension lag, excellent quadriceps control, and quadriceps strength adequate for stable ambulation Progress to WBAT in 0-90° but no weight bearing past 90° 	• WBAT		
Aerobic	Stationary bike (low resistance)	Stationary bike (increase duration and resistance as tolerated)	Begin walk-jog-run progression Elliptical machine	
Range of Motion (ROM) and Strengthening	 Continue exercises from Phase II Closed-chain knee extension Heel raises Weight-bearing gastrocnemius/ soleus stretch Begin step-up program (0-90° only) Lunges Mini-squats Weight-shifts Hip and core exercises Proprioceptive training 	 Continue exercises from Phase III Unrestricted ROM even with weight-bearing Progress closed chain strengthening Progress squat program Begin step-down program Begin leg-press (body weight only) 	 Continue exercises from Phase IV Progress strength exercises Begin plyometrics Progress to sport- specific drills as tolerated Gradual return to athletics as tolerated 	
Other	Modalities as needed to reduce swelling and for muscle re-education Home Exercise Program (HEP) per discretion of Physical Therapist			
Goals	Begin proprioceptive trainingBegin early strengthening program	Progress strengthening	Progress activity as tolerated
